Conservação de Aves de Rapina

Life-Relict

Consciencialização pública e divulgação

Public awareness and dissemination

Cristina Baião, Mariana Machado, Catarina Meireles & Carlos Pinto-Gomes

Castro Verde, 15 de Novembro 2019

LIFE16 NAT/PT/000754

Total amount: 1.654.899 € with 75% of EU funding

Duration: from 01/10/17 to 30/09/22

Beneficiary Coordinator:

UNIVERSIDADE DE ÉVORA
ESCOLA DE CIÊNCIAS E TECNOLOGIA

Associated Beneficiaries

CENTRO DE INVESTIGACIONES
CIENTÍFICAS Y TECNOLÓGICAS
DE EXTREMADURA

MAIN PURPOSE

To improve substantially the conservation status of Continental Portuguese Relict laurel-leaved communities within the Portuguese Natura 2000 Network.

Habitat 5230* - Arborescent communities of *Laurus nobilis*

Conservation Status of **Unfavourable Bad** with the Conservation Trend of **Unfavourable Decreasing**
Ref: 2013-2018 State of Nature Report (Habitats Directive 92/43/CEE)

Rhododendrons

Rhododendron ponticum
subsp. *baeticum*

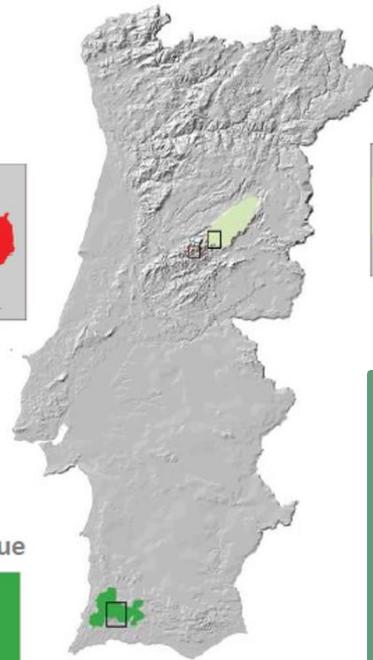

Portuguese Laurel

Prunus lusitanica
subsp. *lusitanica*

INTERVENTION AREAS

SCI of Serra da Estrela – SCI of Açor Complex – SCI of Monchique

MAIN THREATS

Fire

Before 2005

After 2005

Forestry

Alien Species

Climate change

Inability to install new plants

CONSERVATION STRATEGY (through ecology)

Benefit the upper stages of ecological succession by promoting all the potential forests

Carvalho-alvarinho (*Quercus robur*) - H9230

Sobreiro (*Quercus suber*) - H9330

Azinheria (*Quercus rotundifolia*) - H9340

Medronheiro (*Arbutus unedo*) - H5330

Carvalho-de-Monchique (*Q. canariensis*) - H9240

Castanheiro (*Castanea sativa*) - H9260

CONSERVATION THROUGH ECOLOGY IS NOT ENOUGH...

Increase the motivation, skills and cooperation of the local population and regional authorities

SOCIETY

ECOLOGY

ECONOMY

Ensure the dissemination and transfer of knowledge obtained, enabling its replication in other territories

Promote nature-based tourism thus, increase simultaneously social well-being and local economy

METHODOLOGY

Assessment of the perception of local population and technicians about natural vegetation heritage, habitat 5230* and RN2000

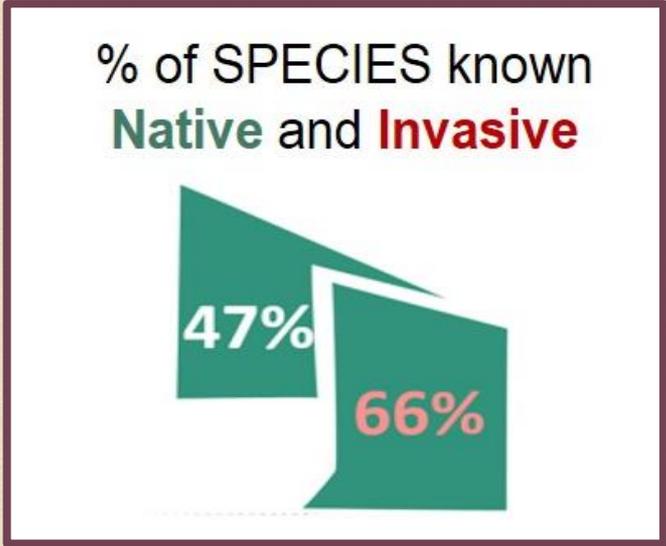

Public awareness and dissemination activities:

Workshops

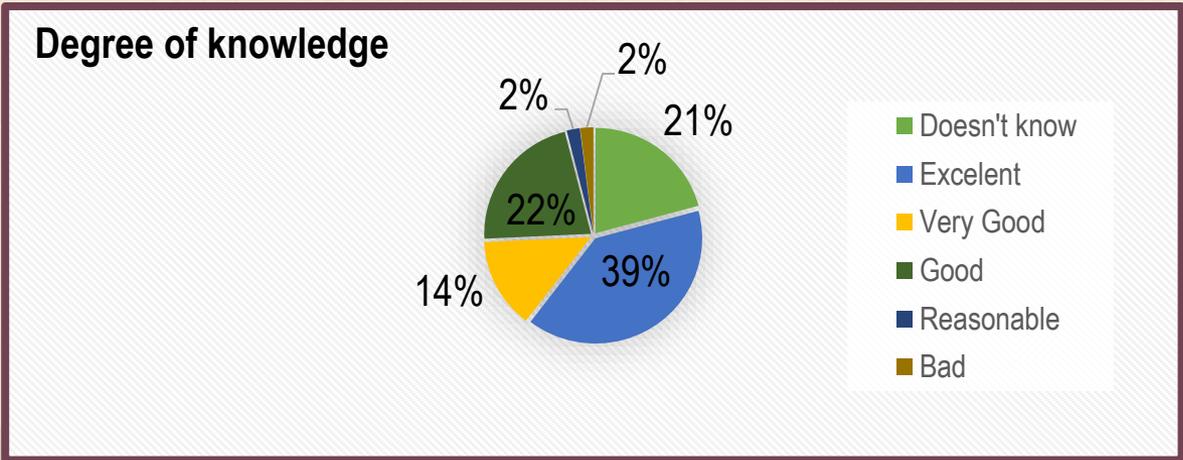

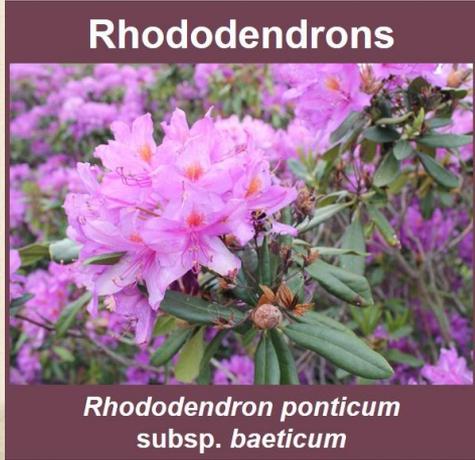

Lectures

Networking

PRELIMINAR RESULTS (on surveys)

PRELIMINAR RESULTS (on surveys) - MONCHIQUE

57% Agree

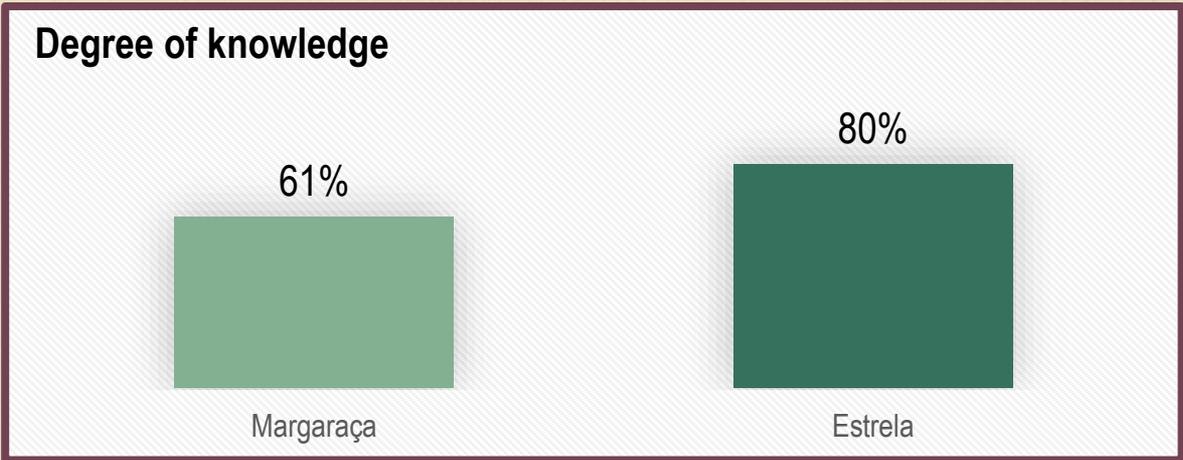

61% Landscape Value
65% Good for Tourism

52% prevents spread of fire

32% legal protection
34% shouldn't be

74% knowledge transmission to the youngest

PRELIMINAR RESULTS (on surveys) – MARGARAÇA & ESTRELA

62% Agree

67% Landscape Value
70% Good for Tourism

53% prevents spread of fire

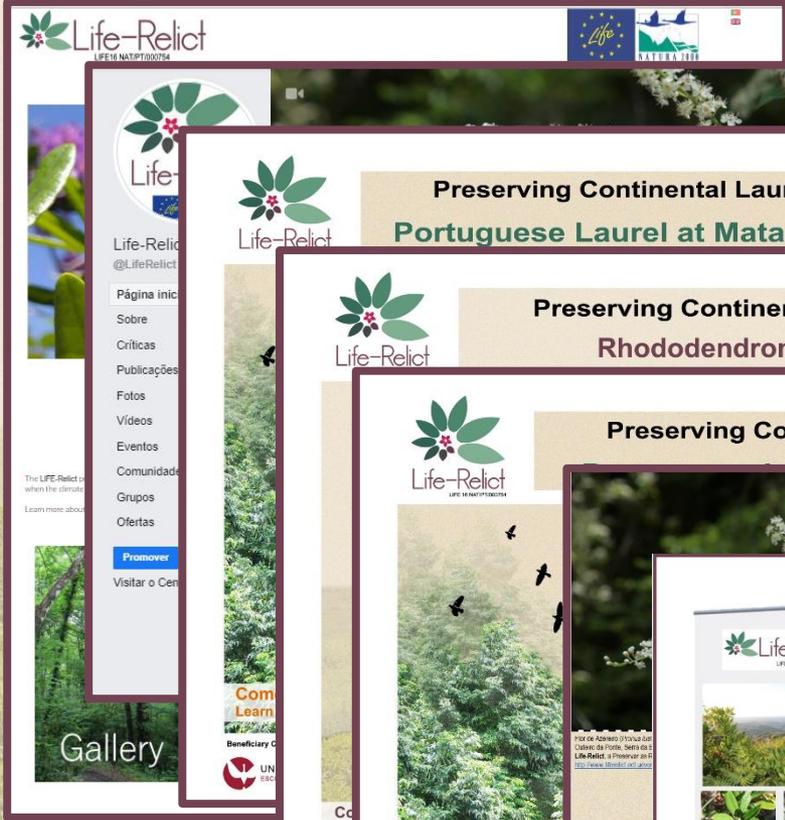

61% legal protection

65% knowledge transmission to the youngest
